CELL THERAPY PROGRAMME
CELL THERAPY PROGRAMME

Deva-Clinique provides access to stem cell therapy for individuals suffering from autoimmune and degenerative illnesses. Stem Cells therapy also has effect of rejuvenation for the whole body and mind.

We are able combine Stem Cells from various sources and Platelet-Rich Plasma (PRP) procedures in required therapy to treat diseases such as diabetes, kidney disease, liver disease, multiple sclerosis, atherosclerosis, vascular disease, and neurologic disease. We are proud our achievement in the treatment of inflammatory bowel diseases with Stem cells. This method was initially presented on Stem Cell and Diabetes Summit 2017 in Boston, USA.

One of the complications of diseases that affect nerves, arteries, smooth muscles, and fibrous tissue is erectile penile dysfunction. Therefore, treatments like Stem cell and Platelet-Rich Plasma (PRP) Procedures that address tissue defects and/or vascular disease aspects of erectile dysfunction may provide a longer-term therapy or even provide a permanent effect in comparison to other treatments.

We have performed the stem cells cure for more than five years with over 70 % results and ZERO side effects.

The best and the longest anti-age effect is achieved in combination with the revitalization procedure on your skin. While stem cells cure you from the inside, skin treatment influences your appearance.

THE CELL THERAPY PROGRAMME OFFERS 3 DAY STAY, AND COMBINES STEM CELLS THERAPY OF THE UNDERLYING CONDITION AND REJUVENATION:

- Initial consultation
- Stem cells therapy
- Autolymphocyte therapy
- Exclusive Deva-Clinique Revitalization
- Two nights stay including full board
- Medical check-up: laboratory analyses, ECG
- Daily follow-up by the attendant doctor, and nursing care

Individuals interested in stem cell therapy are urged to consult with their physician before.

In general, for good results, we recommend to have this treatment two or three times per year.

FACE AND NECK CONTOURING PROGRAM

DEVA clinique with laboratory for tissue engineering stem-cells & immunology
**FACE AND NECK CONTOURING PROGRAM**

Face and neck contouring correction is a non-surgical face and neck lifting procedure, which gives the ongoing noticeable result. In addition to contour correction, we offer the effective revitalization procedure that improves the appearance of skin structure. Combining these two approaches, we can get fast and brilliant long lasting results on your face and neck.

**TWO DAYS EXCLUSIVE DEVA-CLINIQUE CONTOURING, REJUVENATION AND REVITALIZATION OF FACE AND NECK PROGRAMME INCLUDES:**

- Contour correction with fillers (Restylane™, Stylage™ or/and Radiesse™) and/or autologous fat grafting
- Laser biorevitalization and aesthetic correction of face (scar and pigment spots removal, skin rejuvenation)
- Liposuction and liposculpture of face if indicated
- Botulinum injections (Dysport™, Botox™)
- Medical check-up: laboratory analyses, ECG
- Two nights stay including full board
- Daily follow-up by the attendant doctor, and nursing care

In case you need surgical correction of your face and neck, we offer: most effective face and neck lift (SMAS technique) operation or other surgical procedures

FACE AND NECK REVITALIZATION PROGRAMME

DEVA clinique with laboratory for tissue engineering stem-cells & immunology
FACE AND NECK REVITALIZATION PROGRAMME

The programme offers a two-day rejuvenation therapy based on the exclusive placenta extract and laser biorevitalization to restore the skin health. Revitalization therapy – biological stimulation of natural metabolism of the skin. Our approach improves skin condition, making invisible mimic and age wrinkles. In our clinic, we combine individual medical care with the cosmetic procedures. Revitalization is the perfect way to leave the clinic energized, relaxed and feeling truly younger.

This programme is suitable for both men and women, and is recommended from the age of 25-30 and older. After face biorevitalisation skin feels fresh, sleek, elastic. We recommend to repeat the treatment twice or three times a year to make effect persist for several years.

TWO DAYS EXCLUSIVE DEVA-CLINIQUE REJUVENATION AND REVITALIZATION OF FACE AND NECK PROGRAM INCLUDES:

- Exclusive Deva-Clinique Revitalization with extract placenta
- Mesotherapy treatment of premium substances with prolonged period of action
- Biorevitalization and vector lifting face and neck with pure hyaluronic acid
- DOT Therapy CO2 Fractional Laser resurfacing
- Radio frequency (RF) non-surgical facelift (Thermage™)
- Laser biorevitalization and aesthetic correction of face and neck
- Medical check-up: laboratory analyses, ECG
- Genetics analysis of body weight and energy metabolism traits
- Daily follow-up by the attendant doctor, and nursing care
HAIR TREATMENT AND RECONSTRUCTION PROGRAMME

DEVA clinique with laboratory for tissue engineering stem-cells & immunology
HAIR TREATMENT AND RECONSTRUCTION PROGRAMME

Deva clinique offers available for men the most effective programmes of hair loss treatment and reconstruction of facial hair bearing areas (mustache and sideburns), tailored for each individual. Women's hair loss can be more complicated than men's. But we apply only clinically proven treatment that can help most hair loss conditions in women. We use mesotherapy, the hair growth boosters couple with exclusive placental extract or PRP-Platelet rich plasma.

Certainly, we able to offer you surgical hair replacement (punch graft or FUE technique). But these days surgical hair replacement is not the only solution available for thinning or loosing hair. Depending on the severity of one's hair loss, it is our opinion that, men or women should always try an effective combination treatment programme for at least 6 months before deciding on surgery.

After treatment, you will find out about all the clinical aftercare options.

Every Deva Clinique patient has periodic photos taken throughout their treatment programme in order to monitor the changes in their hair density compared to before they started treatment.

Along with hair loss treatment we suggest the effective mesotherapy procedure that improves the appearance of skin of face structure.

TWO DAYS HAIR LOSS TREATMENT AND REVITALIZATION OF FACE PROGRAM INCLUDES:

- Consultation
- Mesotherapy by injecting nurturing cocktails straight in the scalp, bearing areas, mustache, sideburns and/or eyebrow
- Exclusive Deva-Clinique Revitalization with extract placenta
- Revitalization by platelet rich plasma (PRP)
- Surgical hair replacement (punch graft or Follicular Unit Extraction (FUE) technique) if intended
- Mesotherapy treatment of premium substances with prolonged period of action
- Medical check-up: laboratory analyses
- Daily follow-up by the attendant doctor, and nursing care

The number of procedures depends on the severity of hair loss.
FEMALE SEXUAL REJUVENATION PROGRAMME

DEVA clinique with laboratory for tissue engineering stem-cells & immunology
FEMALE SEXUAL REJUVENATION PROGRAMME

New Deva Clinique’s Sexual Rejuvenation Programme is developed for women who have concerns about the appearance and function of their vagina after childbirth, some diseases or due to the menopause. Today there are a lot of non-surgical options available for vulvo-vaginal rejuvenation to target both cosmetic and practical concerns such as labial remodelling of the outer vaginal lips, vaginal tightening for greater sexual satisfaction, a reduction in vaginal dryness to ease discomfort and pain from sexual intercourse, or as a cure for stress urinary incontinence. Similarly, reshaping of the outer labia or vaginal lips is more desirable with the trend for vaginal contouring becoming popular, even with younger women.

Innovations such as laser and radiofrequency for tissue tightening and collagen stimulation use alongside more natural, healing and stimulatory treatments such as Platelet Rich Plasma (PRP) therapy.

Results of the Programme may include: improved libido; more pleasurable and frequent orgasms; improved natural lubrication; decreased pain during intercourse; added volume to the labia majora; vaginal tightened; aid urinary incontinence concerns.

FEMALE SEXUAL REJUVENATION PROGRAMME INCLUDES:

- Treatment by specific for vulvo-vaginal area cross-linked hyaluronic acid dermal filler product (Desirial™ and Desirial Plus™)
- Fractional CO2 Laser
- PRP treatment or revitalization with Extract Placenta
- Medical check-up: laboratory analyses, ECG
- One night stay including full board
- Daily follow-up by the attendant doctor, and nursing care

MALE SEXUAL REJUVENATION PROGRAMME

DEVA clinique with laboratory for tissue engineering stem-cells & immunology
MALE SEXUAL REJUVENATION PROGRAMME

Converting priorities of society, morality and consciousness will inevitably lead to the fact that one of the pillars of modern medicine is improving the quality of human life. One of the important spheres of vital activity of an adult is sexual life. Problems, connected with the functioning of sexual system, strike a crushing blow at man’s self-estimation, they do not let him feel confident.

Deva Clinique can help to solve men’s problems related to dissatisfaction with their appearance, the length or girth of their penis. For men’s sexual health problems, we have non-surgical treatment options, which can be used for treating erectile dysfunction and other penile abnormalities or size issues. In particular, we offer the injection of viscoelastic gels of hyaluronic acid for intimate plastics of penile and platelet Rich Plasma (PRP) therapy for sexual rejuvenation. Combination of the different methods provides long-lasting results. Usually, only one treatment session is required per year, but each patient is different and results can vary per individual, depending on the symptoms treated and the age of the person.

MALE SEXUAL REJUVENATION PROGRAMME INCLUDES:

- Aesthetic and decorative intimate contouring with fillers
- Plastic and increase the glans penis with fillers
- PRP treatment
- Medical check-up: laboratory analyses, ECG
- One day stay including full board
- Daily follow-up by the attendant doctor, and nursing care

Also, we can offer the Fractional CO2 Laser methods of treatment and relieve to resolve much problem in the rectum sphere.
